DEMO DOCUMENTS GUIDE

==========

Purpose

These text documents are clean, fictional test fixtures for demonstrating TenderLens. They contain no real company, government, or personal data.

Files

---

1. demo_tender_request.txt

   Upload as the tender document. It contains eligibility, technical, timeline, and required-document requirements.

2. demo_company_evidence.txt

   Upload as the company evidence document after the tender is processed. It contains evidence for registration, experience, turnover, tax registration, technical capability, warranty, and delivery time.

3. demo_tender_amendment.txt

   Upload as the amendment document. It changes experience, turnover, warranty, solar capacity, and deadline requirements.

Important upload note

The current application accepts PDF uploads only. These .txt files are the source content for test preparation and documentation. To use them in the deployed application, convert each file to PDF without changing the text. Recommended filenames after conversion:

demo_tender_request.pdf

demo_company_evidence.pdf

demo_tender_amendment.pdf

Suggested walkthrough

---

1. Create a workspace named "Solar Water Purification Demo".
2. Upload demo_tender_request.pdf as the tender.
3. Review extracted requirements and source pages.
4. Upload demo_company_evidence.pdf as evidence.
5. Run evidence matching and review the matches.
6. Upload demo_tender_amendment.pdf.
7. Review changed requirements and amendment impact.
8. Export the compliance report as PDF or CSV.

Expected demonstration points

- The tender contains mandatory and technical requirements.
- The evidence pack supports most requirements.
- The amendment reduces the experience and turnover thresholds.
- The amendment increases the warranty requirement from two years to three.
- The evidence pack has a two-year warranty, so the amended warranty should remain a review item or gap for the human reviewer.
